MOHAMED REDA ISMAIL

Full-Stack Software Engineer

mohamedreda.dev@gmail.com | phone: +20 1013201998 | location: Cairo, Egypt
LinkedIn: swe-mohamed-reda | GitHub: mohamedreda22 | Portfolio: mohamed-reda-swe

SUMMARY

Full-Stack Software Engineer focused on building scalable, real-world products. Experienced in developing high-performance web applications using React, Angular, and Node.js, including real-time and media-heavy systems. Adopting modern development approaches such as Agent-Driven Development (ADD) to enhance productivity, automation, and system intelligence. Passionate about solving performance challenges and delivering production-ready solutions.

EDUCATION

Bachelor of Computer Science — Helwan University 2020 – 2024

KEY ACHIEVEMENTS

- Built and deployed 5+ full-stack production applications
- Developed a real-time media platform (YouMak) supporting 100+ concurrent users
- Implemented secure payment systems (Paymob) with webhook handling and revenue automation
- Experience across MERN & MEAN ecosystems
- Adopted Agent-Driven Development (ADD) workflows to improve development speed and automation

EXPERIENCE

MEAN Stack Developer Intern — Orange Digital Center Sep 2024 – Oct 2024
Developed modular Angular components and integrated RESTful APIs
Collaborated in Agile teams using Git and Jira
Improved code structure using clean architecture practices

MEAN Stack Web Development Diploma — NTI Dec 2024 – Jan 2025
Built full-stack CRUD applications using Angular & Node.js
Applied best practices in clean code, modular design, and API structure

PROJECTS

YouMak – Event Photo Sharing Platform (Flagship Project) Live: https://youmak.vercel.app
Built and launched a real-time media sharing platform for events (weddings, graduations)
Enabled 100+ concurrent users to upload photos/videos via QR without app installation
Implemented media upload optimization & Cloudinary processing for performance
Developed live slideshow system and admin moderation dashboard
Designed scalable backend APIs using Node.js & MongoDB
Designed for the Egyptian events market (weddings, graduations)
Tech: React, Node.js, Express, MongoDB, JWT, Cloudinary

Madrasak – Egyptian EdTech Platform (Product-Level Project) Live: https://madrasak.vercel.app/
Built a full-stack platform connecting tutors and students with courses, live sessions, and progress tracking
Implemented Paymob payment system (cards + e-wallets) with secure webhook handling and automated revenue split (75% tutor / 25% platform)
Developed REST APIs for users, courses, enrollments, reviews, and transactions
Integrated Firebase Auth with role-based access (student / teacher / admin)
Built teacher dashboard with analytics (students, revenue, course performance)
Used Cloudinary for media uploads and optimized delivery
Designed scalable Firestore database structure
Tech: React, Node.js, Express, Firebase, Paymob, Cloudinary

Casual Bazaar – MERN E-Commerce Platform Repo: mohamedreda22/casual-bazaar
Built a scalable e-commerce system with authentication & admin dashboard
Implemented JWT authentication and role-based authorization
Designed reusable UI components and REST APIs
Tech: React, Node.js, MongoDB

University Communication Platform. Repo: mohamedreda22/Helwan-Newsline
Led development of a platform connecting students and staff
Built responsive UI and backend services using Spring Boot
Designed relational database schema using MySQL
Tech: React, Spring Boot, MySQL

Bistro Bliss – Restaurant Management System Repo: mohamedreda22/Bistro-Bliss
Developed reservation and menu management system
Built REST APIs and integrated frontend with Angular
Tech: Angular, Node.js, MongoDB

TECHNICAL SKILLS
Languages: JavaScript, TypeScript
Frontend: React.js, Angular, Redux Toolkit, HTML5, CSS3, Sass, Bootstrap
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Tools: Git, GitHub, Docker, Linux, Postman, Jira
Concepts: OOP, SOLID, Clean Code, CI/CD, Agile, Agent-Driven Development (ADD)
