SUMMARY

Junior Full-Stack Developer specializing in MERN and MEAN stacks. Experienced in building responsive UIs with React and Angular, developing Node.js REST APIs, and implementing secure authentication systems. Focused on clean code, database design, and delivering scalable, production-ready applications.

EDUCATION

Bachelor of Computer Science — Helwan University 2020 – 2024
GPA: 2.84 (Very Good)

EXPERIENCE

MEAN Stack Developer Intern — Orange Digital Center Sep 2024 – Oct 2024
Developed Angular applications, integrated REST APIs, and collaborated using Git in Agile teams.

MEAN Stack Web Development Diploma — NTI Dec 2024 – Jan 2025
Built full-stack CRUD applications using Angular and Node.js following clean code practices.

PROJECTS

Casual Bazaar – MERN E-Commerce Platform GitHub Repo
Developed a full-stack e-commerce platform with authentication and admin dashboard using MERN stack. Implemented JWT auth, role-based authorization, reusable React components, and scalable REST APIs.

University Communication Platform. GitHub Repo
Led development of a communication system connecting students and staff. Built responsive React UI, implemented JWT authentication, and integrated backend services using Spring Boot and MySQL

Bistro Bliss – Restaurant Management System GitHub Repo
Developed a reservation and menu management system with Angular frontend and Node.js backend APIs using MongoDB.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java
Frontend: React.js, Angular, Redux Toolkit, HTML5, CSS3, Sass, Bootstrap
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Tools: Git, GitHub, Docker, Linux, Postman, Jira
Concepts: OOP, SOLID, Clean Code, Agile/Scrum, CI/CD, Responsive Design
