SUMMARY

IT Support & Networking Specialist with a Computer Science background and hands-on experience in systems, networks, and troubleshooting. I am skilled at diagnosing and resolving technical issues, supporting users, and maintaining hardware/software environments. Experienced with Windows, Linux, TCP/IP, client-server architectures, and Microsoft 365 & Microsoft Office. Brings software engineering expertise for automation, problem-solving, and optimizing system performance. Strong knowledge of technical software used in contracting and engineering, including Autodesk systems.

EDUCATION

Bachelor of Computer Science — Helwan University 2020 – 2024

KEY ACHIEVEMENTS

-Built and deployed 5+ applications, improving system troubleshooting and debugging efficiency.
-Managed a real-time platform (YouMak) supporting 100+ concurrent users, ensuring performance stability and uptime.
-Implemented and monitored external integrations (e.g., payment systems), handling errors and improving system reliability.
-Developed strong understanding of client-server architecture and system communication.
-Applied structured problem-solving approaches to diagnose and resolve technical issues efficiently.

EXPERIENCE

MEAN Stack Developer Intern — Orange Digital Center Sep 2024 – Oct 2024
-Delivered technical solutions in Agile teams.
-Diagnosed and resolved system & application issues, improving uptime.
-Enhanced understanding of client-server communication and HTTP protocols.
-Provided troubleshooting support for Microsoft 365 & Microsoft Office and user hardware issues.

MEAN Stack Web Development Diploma — NTI Dec 2024 – Jan 2025
- Built full-stack applications with focus on debugging and system reliability.
-Integrated APIs and managed backend data processing efficiently.
-Hands-on experience supporting PCs, laptops, and workstations for performance issues.

PROJECTS

YouMak – Event Photo Sharing Platform (Flagship Project) Live: https://youmak.vercel.app
- Supported real-time user connectivity and handled media upload issues.
- Optimized system performance and reduced latency.
- Worked with cloud services and content delivery systems.

Madrasak – Egyptian EdTech Platform (Product-Level Project) Live: https://madrasak.vercel.app/
- Managed user authentication and access control systems.
- Handled API integrations and system reliability.
- Diagnosed and resolved real-time production issues.

ADDITIONAL TRAINING

-Networking fundamentals (CCNA-level basics) with IP configuration, subnetting, and troubleshooting.
-Real-world troubleshooting scenarios: network issues, connectivity problems, system performance.
-Hands-on experience with Microsoft 365 & Microsoft Office troubleshooting.
-Practical knowledge of technical software for contracting and engineering: Autodesk suites.

TECHNICAL SKILLS

Networking: TCP/IP, DNS, DHCP, Subnetting, Basic Routing & Switching
Operating Systems: Windows, Linux (Ubuntu – basic system usage & command line)
Hardware: PC/Laptop Assembly, Troubleshooting, Maintenance
Tools: CMD, Bash, Remote Support Tools, Git, Postman, Remote Desktop, System Diagnostics
Software: Microsoft 365 & Microsoft Office.
Engineering / Contracting Software: Auto Systems & other engineering/automation tools
Concepts: Troubleshooting, System Administration, Networking Fundamentals
Soft Skills: Problem Solving, User Support, Communication, Fast Learning

Highlights:
Quickly adapts to new systems and environments with strong analytical thinking.
Provides step-by-step guidance for end-users and technical troubleshooting.
Continuously improving networking and IT support skills through hands-on practice and CCNA self-study.

IT SUPPORT CAPABILITIES

-Diagnose and resolve network connectivity issues.
-Support end-users with hardware and software problems.
-Configure basic network settings: IP, DNS, DHCP.
-Troubleshoot system performance issues.
-Resolve Microsoft 365 & Microsoft Office technical issues.
-Provide step-by-step guidance for end-users and technical troubleshooting.
